Introduction

The Heartbeats Brand Electronic Stethoscope combines fun, learning, and interactivity, allowing kids age 4 & up to explore the rhythm of their heartbeats while engaging in STEM-based activities. It fosters an early interest in anatomy and science by enabling children to listen to real heartbeats and body sounds. With plug-in headphones and built-in rechargeable battery, the Heartbeats Brand Electronic Stethoscope is convenient, sustainable, and ready to use right out of the box, providing a seamless and engaging learning experience. This manual includes everything you need to assemble, operate, and maintain your Heartbeats Brand Electronic Stethoscope safely and effectively.

1.SAFETY INSTRUCTIONS

Read all instructions carefully before use

Our Heartbeats Brand Electronic Stethoscope is intended for entertainment and educational purposes and is not FDA approved as a medical device at this time.

WARNING: Supervision is required for children under 4 years due to small parts that may pose a choking hazard.

Adult Supervision is recommended for initial setup and STEM activities. Keep the product away from water, extreme heat, or cold. Use only the accessories included in the package.

3. PRODUCT OVERVIEW

1. Power Button
2. Headphone Jack
3. Carrying Ring
4. Diaphragm
5. USB Type-C Port
6. Heartbeats Pulse LED lights (Internal)
7. Rechargeable Battery (Internal)

4. ASSEMBLY & OPERATION

Connecting the Headphones:

Insert the headphone plug into the audio jack on the Heartbeats Electronic Stethoscope.

Charging Instructions

- Plug the USB Type-C cable into a power source such as wall adapter, power bank, or computer.
- Insert the other end of the cable into the USB Type-C Port on your Heartbeats
- During charging, a glowing LED light will appear inside
- Allow the Heartbeats Stethoscope to charge fully 1-2 hours, the glowing LED light will stop.

5. OPERATION INSTRUCTION

Powering On:

- Press the power button to turn on

PRESS

Using the Heartbeats

- Place on the parts of your body to listen to heartbeats and other body sounds through the plug-in headphones.
- Explore other places indoor and out listening to all the sounds your imagination can take you.

Note: Applying too much pressure can interfere with the sensitivity of the device, creating static or distortion in the sound. By using less pressure, you allow the stethoscope to pick up the subtle heart sounds without adding unwanted noise or static. It's all about finding that sweet spot where you get a clear, accurate reading without overwhelming the device with force.

Powering Off:

- Press and hold the power button to turn off the device.
- The LED lights will flash briefly, then remain steady.
- Release the power button when the LEDs stop flashing

Accessories: Wristband

- Align the wristband with the metal ring
- Open the trigger snap on the wristband securely hook into the metal ring

6. STEM LEARNING FEATURES

Heartbeats Electronic Stethoscope includes a Heartbeats PulsePLAY Adventure Guide: A Fun STEM Activity Booklet

- Understanding the Heart
- Heart Sound Exploration – Compare heartbeats in different conditions (resting vs. active) to encourage curiosity and learning.

7. PRODUCT SPECIFICATIONS

- 180mAh rechargeable battery
- Charging input: USB Type C
- Charging time: 1-2 Hours
- Standby time before auto shut off when not used: 10 mins
- Battery Life is approximately 8 hours of continuous use.

COMPLIES WITH ASTM F963-23

Serial No.: HBP1-2501L01

DC 5V--500mA

Designed & Engineered in Fishers, Indiana USA
Made in China

8. MAINTENANCE AND CARE

- Clean the device with a soft, dry cloth
- Avoid chemical cleaners and do not submerge the device in water.
- Store in a cool, dry place when not in use.

9. TROUBLESHOOTING

PROBLEM = Device will not power on.
Ensure the device is charged.

PROBLEM = Device stops during use.
Standby time, or power low.
Press power button again to reactivate.

PROBLEM = No sound from headphones.
Ensure the headphone connection is secure.
Confirm that the device is powered on.
